STAND-IN IMAGERY: shown to demonstrate the pipeline; this field has no ground-verified pest or disease records.

# Crop Health Report · ಬೆಳೆ ಆರೋಗ್ಯ ವರದಿ

Survey s_b4a7c89e

Public-dataset maize plot (stand-in imagery) · Suresh Kumar · Farmer ID MDY-003 · Pandavapura, Mandya

03 Nov 2026, 03:15 UTC

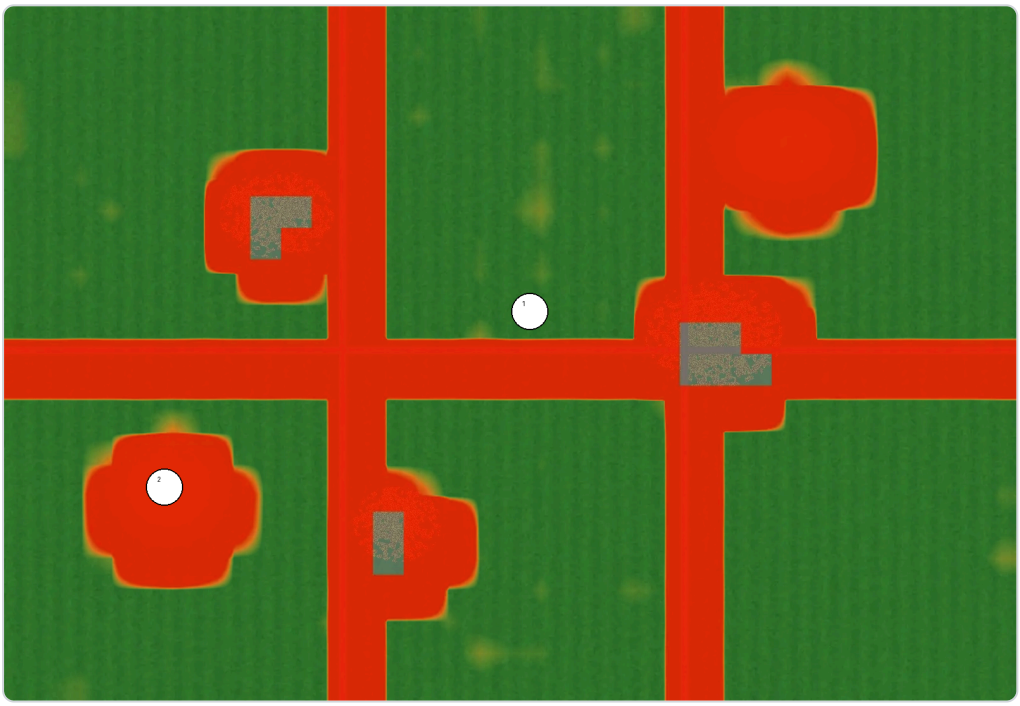

## Summary · ಸಾರಾಂಶ

| Field area | Areas to inspect | Suspicious area | Share of crop |
|---|---|---|---|
| **1584 m²** | **2** | **303 m²** | **19.1%** |

2 area(s) covering 19.1% of your crop (303 m²) look unusual and should be inspected on the ground.

ನಿಮ್ಮ ಬೆಳೆಯ 19.1% ಭಾಗದಲ್ಲಿ (2 ಪ್ರದೇಶಗಳು) ಅಸಾಮಾನ್ಯತೆ ಕಂಡುಬಂದಿದೆ. ಹೊಲದಲ್ಲಿ ಪರಿಶೀಲಿಸಿ.

## Field map · ಜಮೀನಿನ ನಕ್ಷೆ

Numbered circles mark areas to inspect. Brighter colour means a stronger deviation from this field's normal appearance.

## Areas to inspect · ಪರಿಶೀಲಿಸಬೇಕಾದ ಪ್ರದೇಶಗಳು

| # | Priority | Area | Confidence | What the pattern suggests | Ground check |
|---|---|---|---|---|---|
| **1** h_81039237 | HIGH priority | 264 m² | high | Inspect on the ground to confirm the cause. | Pending |
| **2** h_293aca5f | HIGH priority | 39 m² | high | Inspect on the ground to confirm the cause. | Pending |

**Important.** Hotspots indicate potential crop anomalies and require field verification. They are not a diagnosis.
ಇವು ಸಂಭವನೀಯ ಸಮಸ್ಯೆ ಪ್ರದೇಶಗಳು ಮಾತ್ರ. ಕೀಟ ಅಥವಾ ರೋಗವನ್ನು ಖಚಿತಪಡಿಸಲು ಹೊಲದಲ್ಲಿ ಪರಿಶೀಲನೆ ಅಗತ್ಯ.

Priority shows how urgently to inspect, not how severe a disease is. Confidence reflects image quality, agreement between the texture and vegetation-index signals, and area size; it is not a probability of damage. Kannada text is illustrative and pending review by a Kannada-speaking agricultural expert.
